Next Lab
Italy

OUR GROUP FAMILY

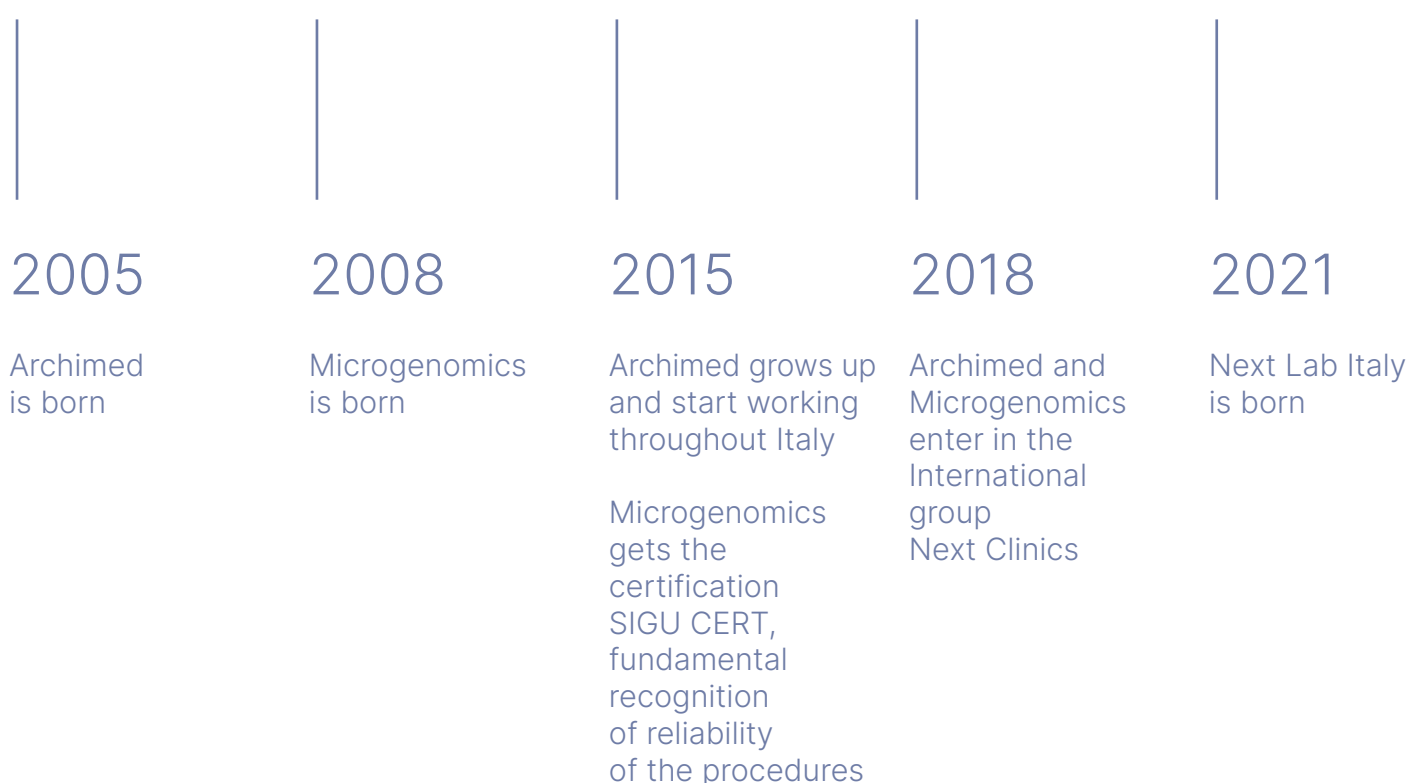

Next Lab Italy is the LABORATORIES division of the international Group Next Clinics, a division in which joined in 2018, Archimed and Microgenomics, two historically Italian companies specialized and qualified in laboratory diagnostics, respectively in the field Cyto-Histology and Molecular Genetics.

Over time, both Archimed and Microgenomics have grown steadily and become important diagnostic reference points at a national level for diagnosis and prevention in the obstetric-gynecological field (prenatal diagnosis, prevention of carcinoma of the uterine cervix), fertility (pre-conception tests), oncology, microbiological/infectious (including sexually transmitted diseases) and, finally, in the field of Human Genetics/Molecular Cytogenetics (Array-CGH and NGS) for the diagnosis of genetic diseases that very often remain undiagnosed.

TIMELINE

Our laboratory responds accurately and professionally to all the specialists' requests, offering the highest analytical quality and adopting technologies with great accuracy and precision.

The high quality, innovation and reliability of our analyses, combined with the skills and the experience of our professionals and collaborators guarantees an excellent level of service offered to our partners.

OUR MISSION

Next Lab Italy srl aims to offer a broad portfolio of highly specialized services, of qualitative and technologically excellence in the anatomic-pathological field, in molecular biology and genetics.

By making increasingly reliable and accurate diagnostic services available and in compliance with high quality standards of the national and international scientific community, our laboratories guarantee increasingly personalized and professional patient management.

OUR VISION

A personalized diagnosis with the patient at the centre:

OUR STRENGTHS

ADVANCED TECHNOLOGIES

The use of highly precise technologies and instruments guarantees the accuracy of diagnoses.

SKILLS, TRANSPARENCY AND SHARING

Our specialists in Pathological Anatomy, Genetics, Biochemistry and Microbiology are always available to support the specialist for a personalized management of the patient and of the diagnosis.

CERTIFIED QUALITY

Our laboratories in Pavia have the most authoritative international certifications (ISO 9001) and are among the few Italian laboratories to possess the prestigious SIGUCERT certification.

QUICK, PRECISE, SAFE AND SPECIALIZED SERVICES

A constant attention to the needs of both patient and the specialist guarantees their support at every stage of the diagnosis (pre, during and post test).

NETWORKS OF PROFESSIONALS THROUGHOUT ITALY

Thanks to a vast network of agents present throughout the country, Next Lab Italy guarantees widespread support throughout Italy to both specialists and patients interested in our services.

SERVICE EXCELLENCE SUPPLY OF KITS

for the draw and shipment of biological samples.

COLLECTION AND TRANSPORT OF SAMPLES

in compliance with ADR regulations.

LABORATORY MEDICINE SERVICE

The **Next Lab Italy** Laboratory carries out its activity under a solvent regime and ensures the provision of a precise, effective, safe and rapid service not only thanks to the use of highly innovative technological instruments but also thanks to the collaboration with sector specialists with decades of experience in the various diagnostic fields.

Furthermore, the supply of consumables for carrying out laboratory analyses is also carried out by leading international companies capable of offering high standards of quality, reliability and certification..

QUALITY CONTROL

Each analytical result must have a high degree of reliability, for this reason laboratory tests must meet the fundamental requirements of: precision, sensitivity and diagnostic specificity.

To monitor its analytical quality, our Laboratory has procedures aimed at verifying the Internal Quality Control (CQI) and participates in External Quality Assessment programs.

The pre-analytical phase is monitored by collecting and analyzing non-conformities (unreceived samples, non-compliant samples, etc.) and promptly reporting them to users (B2B or B2C).

Furthermore, our Laboratory is able to guarantee the continuity of assistance to the user by managing:

- **clinical emergency:** prompt communication to the referring specialist of critical values or values of clinical interest;
- **organizational emergency:** reorganization of personnel for sampling or laboratory activities in the event of a lack of personnel in order to guarantee the service; technological emergency: sending of analyses in service or execution on different instruments in the event of instrumental problems or failure to find reagents in order to guarantee the expected reporting times.

ACCESSIBILITY

The patient, in possession of any prescription from the attending physician, the specialist physician or on personal request, can access the services offered by our Laboratories through a booking system by contacting our contact details or also using the information request form on our website.

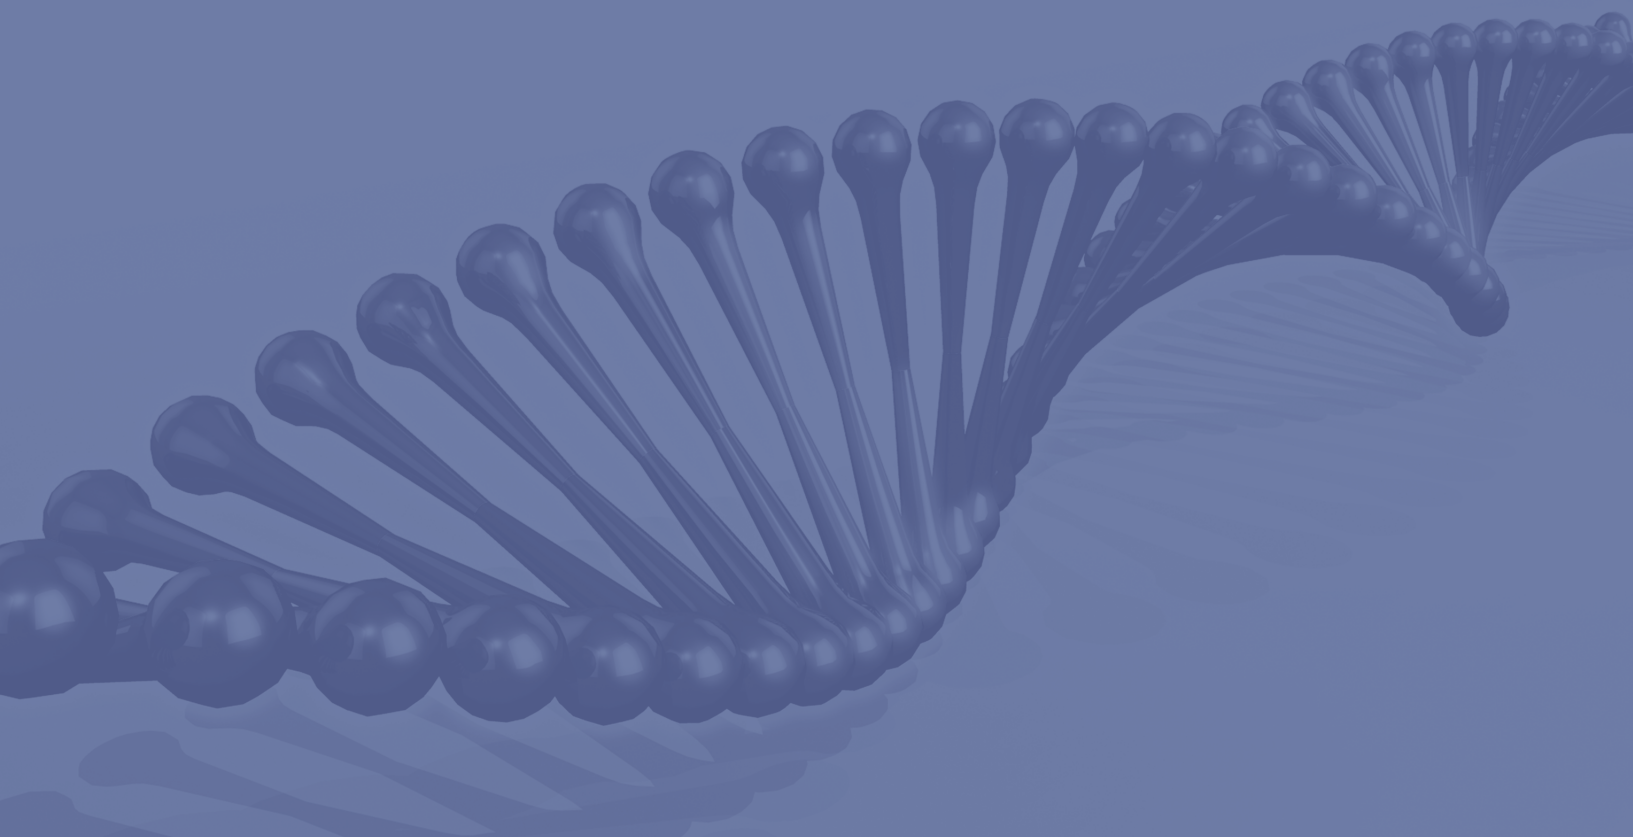

If the services require further information, the balance of the fee will be paid upon delivery of the report.

The administrative staff is available for any information regarding the legislative provisions on privacy, information that is present on all our acceptance forms and on our website.

DELIVERY OF REPORTS

The delivery date of the report is calculated on the basis of the delivery times depending on the type of analysis requested.

The reports are sent by accessing a dedicated and personal reports area, the customer can always proceed with the collection in the facility by appointment and during opening hours.
